Summary

Dual background in Cybersecurity and Criminal Justice with experience in both security operations and human resources. Skilled in analyzing security threats, managing sensitive data, and supporting organizational processes.

Education

Northeastern University, Boston, MA

September 2021 - May 2025

Bachelor of Science in Cybersecurity and Criminal Justice

- GPA 3.5/4.0

Technical Skills

Certification(s): Certified in Cybersecurity (CC) - (ISC)² August 2025

Languages: Python, Java, C, JavaScript (React)

Projects

ScamSavvy: Elder Scam Awareness Web Application

- Built a full-stack React/Vite web application helping older adults recognize common scams, featuring an interactive quiz with three difficulty levels, text-to-speech accessibility, and deployment via Vercel.
- Integrated Supabase to anonymously collect and store quiz response data, with a live analytics dashboard visualizing accuracy rates by scam type, age group, and difficulty level.

Senior Thesis

- Conducted research on cybersecurity threats during the 2020 U.S. Presidential Election.
- Synthesized existing literature to evaluate attack methods and their impact on election security.

Experience

Target, Port Washington, NY

HR Expert

March 2026 - Present

- Review and audit employee time punches and support weekly payroll processing to ensure accuracy and compliance.
- Track and document employee attendance maintaining reliable and up-to-date HR data.
- Support onboarding, recruiting coordination, and employee relations while maintaining confidential employee records.

CarGurus, Boston, MA

June 2024 - August 2024

Security Operations Intern

- Analyzed 2 cloud security tools for effectiveness, culminating in a company-wide presentation of findings.
- Utilized LINQ to create an alert in Devo, effectively replacing and improving upon a previous alert with false positives by analyzing existing security alert data to identify patterns and weaknesses.
- Implemented a Python script to automate queries against the HaveIBeenPwned API, enabling proactive identification of compromised corporate credentials.
- Documented post-incident remediation meetings, shadowed tabletop incident response scenarios, and triaged security alerts.

Creative Services, Inc. Mansfield, MA

June 2023 - December 2023

Public Records Investigator

- Executed criminal background checks across three states and solicited professional references via cold calls.

Northeastern University, Boston, MA

September 2022 - December 2022

Teaching Assistant for Programming with Data

- Supported a weekly lab of 25 students, serving as a Technical Advisor by providing guidance on their projects.
- Led weekly office hours, offering personalized assistance to students on assignments and labs.

Port Summer Show, Port Washington, NY

June 2022 - August 2022

Production Stage Manager

- Created comprehensive spreadsheets and documents containing vital show information while facilitating clear communication between various levels of experienced staff.
